

Imported direct from the Orient in metal lined chests. Blended and packed into 1lb, 1/2lb, 1/4lb, bright Aluminum packages.

It is good tea
RED ROSE ORANGE PEKOE is extra good.

Fight the Fire Fend

The week concluding October 9 last, by proclamation published in the Official Gazette at Ottawa, have declared Fire Prevention Week throughout Canada. The object is, of course, to attract public attention upon the numerous fires, both in life and property, resulting from fire with a view to the adoption of more effective safeguards against fire, and to educate all people and especially children in the habits of fire prevention.

At first glance it would seem to be quite unnecessary for the national government to establish such a week out of every ten years for the purpose of reminding a presumably intelligent, educated and law-abiding people to safeguard their own lives, homes and property from destruction. Unfortunately, Canada's fire record proves conclusively that it is not necessary to keep up a persistent campaign to educate the people from their childhood and throughout life in this vital matter.

Canada, which is so progressive in many ways, just has taken the leadership in numerous worldwide movements, and on this the honor of prevention, occupies a low place among the nations of the world. When statistics of fire losses are studied, few countries, if indeed any, annually record the appalling fire losses which take place in Canada. This country's fire loss per head of population is the highest in the world and the passing years do not seem likely to improve.

Canada has almost strangled the fire not merely of millions but tens of millions of dollars annually. Very little is done in the line of prevention, and when long periods of time will be required to make good the loss in other districts. And these losses are one of Canada's greatest miseries. The loss of life and property is enormous, and the loss of time, equipment, and large expenditures to augment water supplies for fire-fighting purposes greatly in excess of the daily domestic requirements of cities and towns.

All these facts of prevention are necessary, and must be paid for to our title. But because of the frequency of fires, the result of carelessness and neglect of the most ordinary precautions on the part of many people, these services have to be maintained on a very large and expensive scale than would otherwise be necessary.

Fire-Prevention Week should, therefore, be observed all over the country. Special attention should be paid to the subject in all schools, while each individual citizen should be made a little more intelligent as to the causes of fires and make a close check-up of conditions in and around all buildings. Remedies should be developed, reported, stored, placed, electric wires, gasoline and oil stoves attached to the gas supply, and the fault corrected to prevent the greatest cause in handling of matches and all combustible materials. Right house, right place, right time, right way, right fire. Finally, all people should be adequately instructed notwithstanding all precautions that may be taken.

Attention to these important matters may not save much loss and suffering in the future.

Praise For Canada Civilian Aircraft Machines

Gift Cost and Light to Come will Twenty Different Organizations Operating in Canada. Within seven years Canada has become independent of foreign cars and trucks by manufacturing its own cars and trucks to a national purpose which will produce all her own cars for the use of the Canadian people. The production of the cost of existing cars, and the cost of the new cars, is being reduced, and the cost of the new cars is being reduced.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER VII.—Continued

The magistrate proceeded to give judgment. "Stand up," he commanded again.

Helm stood.

"You see — she understands — I thought she did."

Addressing Helm he said, "You could have cleared yourself perhaps of one charge, but not of the other. So I have no option but to send you to jail. You shall be confined for three months at Stoney Mountain."

Miss Rodgers was on her feet. "I appeal the case," she said.

The court room began to empty. Only the regulars held their seats. The transients were going. Some of the women would go back to attack the dishes they left in the sink; others went to inspect the shop windows; two of them strolled leisurely down to the White Lunch to have a cup of coffee and a piece of pie. It was near lunch time, and as Mrs. Morris remarked to her friend Mrs. Edgar, "When a woman has only herself to cook for, she never cares when or what she eats."

They discussed the case as they sat at the marble topped table.

"That girl was innocent," said Mrs. Morris, "but foolish, I'll bet she's shielding a man."

"Oh, I don't know," remarked her friend. "I remember when I was her age I had an awful crush on a woman about ten years older than I was. I forget her name now, but she was my goddess for the time. There was something fine in that girl's face — something noble. It seems a pity to send her to jail, where she will have to see and hear everything that's vile and ugly. The whole thing is rotten."

"Well," said the other one, "why don't we try to do something?"

"What's the use?" Mrs. Edgar was breaking her pie with her fork. "Women never hold together. That's why people like Magistrate Windsor can insult the women's organizations and get away with it. The women's clubs are trying to make things better, and they get blamed for what goes wrong. You and I do nothing and therefore are never blamed for anything. Great system!"

"Well, some of the women in the clubs are funny," said Mrs. Morris. "I saw one of them the other day getting her money out of a pocket in her petticoat. She's one of their big spouters, too. Why don't they keep up with the times, visit beauty parlors and learn the use of cutex?"

The other woman considered a moment. "Still, there's nothing criminal in keeping money in the pocket of your petticoat," she said, "when you come to think of it. She was lucky."

OPERATION LEFT HER VERY WEAK

Letter Tells of Wonderful Relief After Taking Lydia E. Pinkham's Vegetable Compound

Coniston, Ontario.—"After a severe operation and lay in a hospital I returned home so weak that I was unable to move a chair. For four months I was almost frantic with pains and suffering until I thought sure there could not be any help for me. I had very severe pains in my left side and suffered agony every month. One day when I was not able to get up my mother begged me to try your medicine. My husband got me a bottle of Vegetable Compound at once and I took it. I started a second bottle, and to my surprise and joy the pains in my side left me completely and I am able to do all my work without help. I am a farmer's wife, so you see I can't be idle long. In all, I have taken six bottles of Lydia E. Pinkham's Vegetable Compound, five boxes of the Compound Tablets, two bottles of Lydia E. Pinkham's Blood Medicine, and have also used the Sanative Wash."—Mrs. L. LAJUNESSE, Box 103, Coniston, Ontario.

W. N. C. 1925

Matron interrupted to ask him to retract the word "fallen." She gave the Board members positive chills by the things she said about the double standard of morals which was made by men to shield men, and went on to tell them that many of the girls were innocent young things from the country who had come to work in the city to help the family at home, and had fallen victims to men's lust and hypocrisy. The very men who led them astray, fathers of families some of them, and regarded as respectable men in society, no doubt now spoke of these girls as "fallen women."

It was most embarrassing. She hinted that there should be women on the Board and questioned the ability of men to quite understand the problems of rescue work.

Anyone can see from this what sort of woman the Matron was and why the Board dismissed her. The girls had loved her and had done their best to carry out all her wishes. They had scrubbed and washed and polished the home until it sparkled; they had planted a garden and made flower beds; they had sewed and crocheted and embroidered; they had studied, sung, prayed, and bravely tried to live a useful happy life. The day she left the scenes were disgraced—not a girl sat a mouthful; they just sat and cried. The Board could see they had done well to get rid of her; she was having such a weakening effect on the girls.

The Board decided then and there to have a man for the head assisted by a woman of course. "There must needs be a woman," said the good old Dr. Smythe, "for appearance sake at least." So, after diligent care, Mr. and Mrs. Wymuth were found somewhere in the East where they were doing evangelistic work. Their letters of recommendation abounded in such terms as "earnest co-operation," "moral worthiness," "deep sincerity," "unfailing devotion," "passion for souls," etc. The Board was pleased with their joint and several appearance.

(To Be Continued.)

Scientists Still Puzzled

So Far Have Failed To Find Origin Of Strong Rays

Before an audience that packed the lecture hall, at Leeds, England, Professor R. A. Millikan of the University of California, described his late studies of cosmic rays. Professor Cockcroft, Swiss physicist; Hess, Austrian, and Koehler, German, independently sent up measuring instruments in balloons to determine whether rays came from the earth or the stars. Millikan took up the work in 1923 and measured rays on Pike's Peak and in balloons at a height of ten miles. The higher the instrument rose the more powerful the rays became. No doubt was left of the rays' celestial origin by Millikan's experiments of 1925, which attracted world-wide attention.

Millikan now reports the results of studies he and Dr. Cameron made in Bolivia last summer at altitudes of 15,400 feet and in Arrowhead Lake, California, with a new apparatus eight times more sensitive than heretofore used. The new findings are even more striking than the old. So powerful are these strange rays, they easily penetrate a hundred and twenty feet of water, equivalent to eleven feet of lead, and lead, he remembered, is metal used by X-ray operators to protect themselves against injury.

Whence do the rays come? Millikan cannot answer. An entirely new field for physiographer is opened. The rays that come from some undetermined point in space and are more powerful and penetrating than any man can produce must have some effect on the human body and more influence on human life and happiness.

Offer Is Accepted

Following the announcement made by Sir Arthur Keith that the British Association for the Advancement of Science intended to acquire the home of Charles Darwin, at Bromley, Kent, Dr. Buckston Brown telegraphed offering to buy the home for the nation. The association has accepted the offer.

The discovery that the fiber of the cocoon spun by the silkworm could be made into cloth is ascribed to Se-Ling-She, a Chinese queen who lived about forty-seven centuries ago.

City Visitor—Why do boys leave the farm?

Discouraged Farmer—Because they can't race trains to a crossin' g with a mowing machine, I reckon.

Men fuss so much at the foibles of women because women are the only creatures man expects to be perfect.

Animals don't talk, which indicates that they think. If you'd stop to think you wouldn't talk so much.

Churchill and Nelson

West Coast Of Hudson Bay Possesses Only Two Large Harbors

In view of the rush of construction to complete the Hudson Bay Railway to tidewater and decision as to terminal facilities, the following remarks dealing with conditions on the coast affected, as taken from a report published by the Natural Resources Intelligence Service, Department of the Interior, Ottawa, on the resources of the Hudson Bay Railway Belt and Hudson Bay, may be of interest.

"The only harbour facilities on the west coast of Hudson Bay suitable for railway terminals are the natural facilities of Churchill and the partially constructed harbour at Fort Nelson.

"Churchill harbour is completely landlocked by rocky points and consists of a relatively small lagoon 30-40 feet deep with $\frac{1}{2}$ square mile in which ocean going vessels can anchor and with a bottom of hardpan filled with boulders. The channel approach is short and 2,000 feet wide, well indicated and with a depth of 60 to 100 feet at the harbour's entrance. The current is 5-6 miles per hour at ebb tide and the tide is uniformly 11-12 feet at its maximum, the harbour being approachable at all its stages, but is closed by ice covering 7 months of the year, from November 15th to June 15th on an average. The river freezes about a month earlier. There is good anchorage and a vessel of 24-foot draught can approach within 150 feet of the east side of the harbour. Dockage could be easily added.

"The roadstead of the Nelson River has been partially converted into an artificial harbour by the engineers of the railway. It is a V-shaped estuary with a long and twisting approach 1,200-3,000 feet wide, 17-20 feet deep at low water and 20 miles long and with natural exposed anchorage available some distance from the post. The harbour works consist of a 17-span bridge 3,500 feet long leading from the shore to an artificial island paralleling the channel. The island is built of filled timber cribs with docks. The anchorage will be 30 feet deep at low water and 50 at high water with a width of 300 feet. Tides range between 8 and 20 feet, average spring tides being 16 feet.

"Floating ice, driven by tides and winds across the flats, will carry away buoys during August and after the 15th of October. Solid ice breaks up about June 1st. The estuary is open half of the year, and Dr. Robt. Bell of the Geological Survey reported that during the winter of 1879-80 it did not freeze across for some 40 miles above tide water. Vessels approaching the harbour get in touch by wireless and pick up their pilot 20 miles out from the inner anchorage. They can only enter the harbour at high tide and in severe weather are obliged to remain at sea.

"While Hudson Bay is not entirely frozen over during winter, ice-cover is formed for 60 to 70 miles from the shores on the east coast often constituting a bridge between the islands and the mainland, and in other parts of the bay, where the shores are flat, solid ice extends to sea for from one to five miles."

Rifle In Vancouver Museum

According to the Vancouver "Province" days of the historic Northwest Rebellion and Louis Riel, rebel, are recalled by the addition to the Vancouver Museum of a rifle carried by that outlaw during the stirring days of 1885. A heavy repeater, one of the first manufactured, it is still in as good working order as it was when it was surrendered. It came into the possession of the late Col. T. H. Tracy and was presented to the museum by his widow.

Teaches Glass Blowing

The University of Pennsylvania is the only large school in the United States which offers a course in glass blowing. The Professor is Frederick Wagner, one of the few glass blowers left in Pittsburg. He has four students.

Some men's natural bent seems to be patterned after a corkscrew.

A good man isn't necessarily a desirable neighbor.

Employment Agency Manager—So you'd like to employ a mason. What kind do you want?

Ill—I'd like to have one of them Free Masons I've heard so much about.

The fire brigade of a European village dashed into the village inn and the chief fireman said:

"Beer and sandwiches all around, please, and hustle up the order. We ain't got any too much time. We're on our way to a big fire."

Tablets found in ancient Babylon and Assyria show that banking transactions were carried on 5,000 years ago. Cheques and notes were made of clay, which were then baked.

Drives away pain — Minard's Liniment.

Experiments of more than thirty years have proven that Aluminum is the best container for tea. Red Rose Tea is now packed only in Aluminum, and every package is guaranteed to be in perfect condition.

Lates Idea In Novelty Revue

A Novel Idea Is Put Across At the Calgary Exhibition

American producers of theatrical revues looking for new ideas for fairs and exhibitions may profit by an original novelty recently offered at the Calgary Exhibition and Stampede. The feature of the evening program in front of the grandstand was listed as a "Grand Novelty Revue." At the first performance the audience expected to see a bevy of pretty girls on the stage when the curtain went up for the "Grand Novelty Revue." Instead they saw some of the aristocrats of the live stock world of Western Canada. Then followed a series of scenes illustrating the progress of agriculture in the Canadian West from the time of the passing of the herds of buffalo down to the present time. The pure bred stock that took part in the revue seemed to be conscious that they were expected to "do their stuff" well and they did it. The revue was staged with elaborate scenic and lighting effects and was a popular success from the start. During the week the exhibition was on the revue drew capacity audiences and throughout the week a record attendance was registered at the "dressing rooms" of the principal actors and actresses. The revue showed that the fame of Western Canada does not rest only on the fact that it is one of the world's principal wheat producing areas, but is an important producer of every kind of live stock.

Another British Aviator Killed

Young Officer Was Fortieth Victim This Year

Fatal casualties in the Royal Air Force this year rose to forty when Pilot Officer Harold C. Kelly, twenty-three years old, died in a hospital soon after his single-seater Woodcock fighting plane had fallen at the Avon Wiltshire air-drome.

Strychnine was administered to the flyer as axes and wire-cutters were used to extricate him from the wreckage of the machine, which, in getting into a tall spin at 400 feet, corked three times and then crashed into a nose dive.

Kelly was still alive when lifted from the cockpit, but died shortly after his arrival at the hospital. He had been in a similar accident two years ago, both arms and one leg being broken, but he was undeterred and continued his flying exercises in view of qualifying for a flying officer's certificate. It was the fifth fatal accident associated with this air-drome in six weeks.

Sores Flee Before It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

Would Avert Oil Famine

Scientist Discovers Process To Get More From Wells

An impecunious government scientist has developed a process which will permit nearly 100 per cent. of the oil supply to be taken from oil wells instead of 15 per cent., which is the present average.

Dr. P. G. Nutting discovered that by the simple use of washing-soda this elusive 85 per cent. of hidden oil could be dissolved and extracted from the sand.

Laboratory tests were 100 per cent. perfect, but in actual field operation the results may not be so great. Oil experts say if it costs 40 per cent. it will stand off for a considerable time the anticipated oil famine which is expected to develop at the end of six years.

Employment Agency Manager—So you'd like to employ a mason. What kind do you want?

Ill—I'd like to have one of them Free Masons I've heard so much about.

The fire brigade of a European village dashed into the village inn and the chief fireman said:

Will Return War Relics

U.S. Colonel Has Large Collection Of German and Austrian Souvenirs

A man of 52, whose diffident manner and youthful face belie his age and his attainments, sailed from New York recently, en route to Hamburg, Germany. With him a small wooden box and a large packing case.

The man, who is Lieut.-Col. George Crouse Cook, R.C., U.S.A., possessor of a Conspicuous Service Cross for work during the World War, will, if asked, refer to the contents of the wooden box and the packing case as "junk," but he has cherished that junk enough to have catalogued every item of its 500 component parts.

Specifically, the small box contains such things as caps, epaulettes, citations, pay books, Iron Crosses, wound medals, etc. all belonging to German or Austrian troops who fought the Allies, and picked up by Col. Cook during his service in France. The packing case is filled with Zeppelin parts, pieces of shell, helmets and larger trophies.

Col. Cook, for example, will try to find Alfred Merten, of Gothia, Saxony. For in the small wooden box is an infantry cap and a shoulder strap which were taken from Merten by the French at Blaches in Artois, July 9, 1916. Col. Cook wants to restore the cap and strap and learn Merten's version of the war.

Another item Col. Cook wants to give back is a wound decoration, a stamped medal, finished in silver, that was bestowed upon Vladislav Jagla of the Fifth Company, 463rd Prussian Infantry, for being wounded four times at the front. Jagla was captured on September 30, 1918, at Montigny.

Little Helps For This Week

Ye are all the children of light and the children of the day.—1 Thess. v. 5.

If one looks upon the bright side, it is sure to be the right side. At least that's how I've found it as I've journeyed through each day. And it's queer how shadows vanish. And how easy 't is to banish. From a bright side sort of nature every doleful thing away.

—Mary D. Brine.

There are souls in the world who have the gift of finding joy everywhere, and leaving it behind them when they go. Their influence is an inevitable gladdening of the heart. They give light without meaning to shine. Their bright hearts have a great work to do for God.

—Frederick W. Faber.

The habit of looking at the best side of any event is worth far more than a thousand pounds a year.

—Samuel Johnson.

Corns are painful growths. Holloway's Corn Remover will remove them.

Auntie—"Do you ever play with bad little boys, Willie?"

Willie—"Yes, Auntie."

Auntie—"I'm surprised. Why don't you play with good little boys?"

Willie—"Their mothers won't let me."

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

If, after years of toil, a man wins success some day is sure to come along and tell him how he might have won it in half the time.

Minard's Liniment relieves backache.

"It's never too late to say dye," said the red-headed girl.

"Yes, it is," said the bald-headed man.

Mothers, Your Health Must Be Up to Par

—Evans' Studio

London, Ont.—"During one of my expectant periods I was so weak and nervous I could not get around, my head ached, I felt heavy all the time and suffered with sick stomach. I was advised to take Dr. Pierce's Favorite Prescription, and after I began taking it I got along fine. It relieved me of all the bad effects, made me well and strong, my nerves were good, and I kept so well I could do all my own work and I had a fine healthy baby."

"I also find that Dr. Pierce's Pleasant Pellets keep the stomach, liver and bowels in perfect working order and never cause distress."—Mrs. James Campbell, 109 Inkerman St. (picture above). All druggists.

Send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., if you desire a trial pkg. Favorite Prescription tablets or Pleasant Pellets.

Betty: Have you a green lipstick?

Shop Assistant: Green lipstick?

Betty: Yes, a railway guard is taking me out tonight.

THE TONIC THAT GIVES STRENGTH

After Acute Diseases the Blood Must Be Built Up Before Recovery Is Complete

Fevers and other acute diseases like pneumonia and influenza, leave the patient weak, with thin blood and unstrung nerves. The period of convalescence is often long and trying, and years of poor health have frequently followed so brief an illness as an attack of influenza or pneumonia.

Much of this sort of misery could be avoided by taking steps to build up the blood so that it can carry to the nerves and other tissues of the body the elements they need to restore their normal functional activities. To build up the blood and restore it to its rich, health-giving vigor, no other medicine can equal Dr. Williams' Pink Pills. From first to last it is their mission to improve the blood and thus restore good health and vigor.

The value of these pills in conditions described above is shown by the statement of Mrs. Rebecca O'Brien, Pembroke, Ont., who says:—"In Nov., 1923, I was stricken with pneumonia, and at the time but little hope was held out for my recovery. However, with the best of care I was able to walk about after some months. But I did not recover my strength. The doctor told me I was anemic. My appetite was poor, I grew nervous and restless, I was deathly pale and practically gave up hope of ever being strong again. However, remembering that in my girlhood I had taken Dr. Williams' Pink Pills with decided success, I decided to try them again. By the time I had used two boxes there was no doubt the pills were helping me. Continuing their use I was soon able to attend to my household duties. I continued taking the pills, however, until I had used twelve boxes, by which time I was enjoying better health than at any time in the previous ten years. In gratitude for what the pills have done for me, I give this statement in the hope that it may point the way to health to some other weak, despondent woman."

You can get these pills from any medicine dealer or by mail at 50 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Men sometimes become wiser as they grow older, but they seldom become less foolish.

BUILD AND LET BUILD

As far back as history begins, there have been persons who have stood in the way of progress, some for reasons mercenary, others because of a real lack of vision or natural narrow tendencies. It is a matter of record that the builders of the ancient cities and public monuments, some of which still exist were met by hundreds of obstacles placed in their way by visionless men, who did not have the future interests of their community and the world at heart. This same condition may be applied to our own community today. We see opposition to things that would expedite business or cause an economic improvement or would in humanity's sake afford protection against sickness or the killing of hundreds of motorists or pedestrians. Here there should be no room for obstructionists. Pages of history are being built and there should be nothing at this time to hamper its progress. The truly great men of all time is the builder, the one who produces or helps to produce. The parasite, who does nothing; for himself or fellowmen, is a cheat, and the one who interferes with progress is little better. "Build and let build" should be our motto and the future will comfortably arrange itself. There are many things to be considered in the building up of a community. Ter men can do more than one and when these ten men are arranged in team formation, their work can not only count much more than 10 times but in fact 20 times as much.

WONDERFUL SCIENCE

A few years ago a scientist discovered that it is dangerous to kiss without first washing the mouth and lips with an antiseptic remedy. Up on every lip lurks bacteria awaiting an opportunity to switch its location. Look not upon the lips when they are cherry red in the moonlight, for in the end the microbes will sting you and the bacteria will bite you into an early demise. Science is wonderful. It reveals many unknown dangers that we have dallied with in the past only escaping the terrors of bacteria by an element of luck. While science has revealed this greater danger, and provided a remedy, it has also increased mental anxiety. Suppose a girl with ripe bacterial lips should suddenly grasp a man and kiss him before he could flood his mouth with antiseptics what agony he would endure waiting for the bacteria to develop, and carry him beyond the clouds. It is simply awful to contemplate the chances we run every day, and a man to be reasonably safe should be a clerk in the store of a man who does not advertise. Bacteria are never swapped when a man is alone.

When we hear on these wide prairies of someone complaining of their neighbors thrashing on Sunday we think of the lady who complained to the police that a man was bathing naked near her home. Next day she phoned the police, "I can still see that man I complained of yesterday bathing naked two miles down the beach." "Now lady! that is a long way to see!" "But I tell you I can see him through my field glasses." "How shocking!" murmured the chief.

About 30 years ago a young Englishman went to the United States to find his opportunity. He found it and seizing hold of it, acquired both fame and wealth in the city of Washington. Just the other day this man said: "I wish that I were a young man again, leaving England to find a place for myself. I would go to Canada. I could accomplish more in Canada in the next generation than I have done in the United States in the past generation. Canada is at the turning point. It is the young man's country of today."

The annual sale of work, given by the Women's Auxiliary of St. Andrew's church, will be held on Saturday, December 3rd, in the afternoon.

The Call from now to Dec. 31, 1928 only \$2.

Here and There

One year from date of publication in the Canada Gazette new regulations requiring the inspection and grading of fruit for exportation come into effect. They will require that all fresh fruit must be inspected and an export inspection certificate issued showing the grade before leaving the country.

A record was established at Quebec recently with nine passenger vessels arriving and landing passengers and mail, the largest number ever to visit the port at any one time. Included in the arrivals were the "Empress of Scotland," the "Montclair," "Montclare," "Marloch" and "Melita" of the Canadian Pacific Steamships.

A new high record of \$15,824.821 in gold production of the province of Ontario during the first half year is shown in the report just out. The increase over the similar period of last year being a quarter of a million. During the same half year the total production of all minerals in Ontario was \$45,103,223, as against \$42,584,402 for the same half year of 1926.

To serve the interests of hundreds of farmers in Southern Saskatchewan two new branch lines of the Canadian Pacific Railway started operation on September 1st according to announcement by D. C. Coleman, Vice-President, C.P.R. The longer of the two lines run from Assiniboine south to Coronach, a distance of 59 miles, and the second, a 27-mile stretch, runs from Bromhead to Lake Alma.

The 100 members of the British Newspaper Society left Canada thoroughly impressed with the opportunities Canada possesses. Their impressions are that Canada was already great and is potentially much greater, and they were amazed that so much could have been accomplished in Canada in such a short time by so few people. They sailed from Montreal on the Canadian Pacific Steamship "Montclair," the ship having a large passenger list.

After a strenuous six weeks travelling across the Dominion of Canada, Their Royal Highnesses, the Prince of Wales and his brother George, embarked on the Canadian Pacific Flagship, the "Empress of Scotland," tired but happy. Prince Edward says, "Every time I come to your country I am more and more attracted by the wonderful natural scenery and the warmth of the welcome extended by Canadians, and trust that it will not be long before we meet again."

Approximately 1,000 members of the American Legion visited Montreal on their way to Paris, France, where they will hold their 9th annual convention. The people came from Idaho, Buffalo, Wisconsin, Washington, Montana and North and South Dakota. Frank X. Schwab, mayor of Buffalo, gave the Legionnaires of that city a wild buffalo to be presented to the citizens of Paris. They crossed to Antwerp on the "Montclair" and "Montroyal," both liners in the Canadian Pacific service.

"A land of good wages and unlimited possibilities," is the manner in which Premier Stanley Baldwin characterized Canada in his first public address in the Old Country after his return from the Dominion. Ninety-five per cent. of the men (of whom we hear too much) who go out to the Dominion and fail, owe their failures to themselves. I have no doubt that a man can succeed on the land there even if he has not been brought up in the country at home. A little training will go a long way."

The Call from now to Dec. 31, 1928 only \$2.

Things have gotten so lately the old man has to ask the children two or three days ahead if he can borrow the car.

They can remove knocking from the automobile engines, but a Gleichen man says it can't be removed from the back seat when the wife is along.

Here and There

From the year 1919 to 1925 there was an increase of \$1,303,772,886 in the total taxable value of realty in Canada, according to the Dominion Bureau of Statistics. The value in the latter year was \$7,331,785,535.

The maple syrup production of the Province of Quebec will be in the neighborhood of 20,000,000 gallons, it has been officially estimated, this being an average output. The season has been much more advanced than in former years.

The pulp newsprint mill of the New Brunswick International Paper Co., Ltd., will be erected in Dalhousie, it is understood, as it is said that satisfactory arrangements resulted at the conference between representatives of the company and the town council.

A school will be established at the Vancouver Shops of the Canadian Pacific Railway for the purpose of instructing the apprentices in mathematics and drawing, it was announced recently by A. Sturrock, assistant superintendent of motive power, western lines.

"Merry Sunshine," an eight year red poll cow, bred and owned by Gowan Brothers, of Kamloops, has recently completed a 365-day R.O.P. test and established a new Canadian record with 13,517 pounds of milk. This record was made under ordinary farm conditions on a ranch nearly 4,000 feet above sea level, the cow staying out of doors day and night.

A cable from London, England, reads: "Following the perfection of a method for the production of artificial wool from pine needles by Italian and German scientists, a British financial and industrial corporation is in touch with Quebec Provincial Agents Office at Quebec city investigating the possibility of establishing such an industry in Quebec Province."

A great future for tobacco growing in Western Ontario is predicted by the Hon. J. S. Martin, Provincial Minister of Agriculture, who states that counties engaged in this industry have demonstrated that they can grow as fine tobacco leaf as Kentucky or Virginia. A number of experts have been engaged, he announced, to visit new growers and give them all information possible.

Supervising 200 Norwegian settlers, including wives and children, from the districts of Nottodden, Heddal and Valdres sections of Norway, Eric Platebo, chief clerk in the Canadian Pacific Railway offices at Bergen, saw the settlers off for Winnipeg from the Windsor Station, Montreal, fifty of the party are going straight to relatives. Mr. Platebo estimates that some 600 persons from the districts named will eventually come to Western Canada.

Via Canadian Pacific Railway recently there was forwarded to His Holiness the Pope an album of photographs of the Canadian Rockies offered by E. W. Beatty, Chairman and President of the system, following the suggestion made by a prominent Canadian citizen who had described the Canadian Rockies to His Holiness in an interview some time ago. A wish for a book showing views of the mountains was expressed by the Pope whose wish was conveyed to Mr. Beatty. The album is beautifully bound in white kid.

Canadian ilmenite ores will soon be used in the manufacture of a new pigment called "Titanium White" (to be used in the same way as white lead) according to R. H. Monk, of Montreal, who states that plans are nearing completion for the erection of a plant in Montreal, and, if everything develops as expected, this plant will be set up in the autumn. The development branch of the Department of Colonization and Development, Canadian Pacific Railway, has been active in furthering the establishment of this industry.

CHAPTER VIII.—Continued

The Wymuths were exactly the same type—black-eyed, pale, anaemic, with lustrous thin, black hair, through which a bloodless scalp showed blotchy, false teeth—no, not false—everyone could see what they were—artificial, rather—so white they were almost blue. They believed in hell and spoke of the "world" in a tone which implied both horror and contempt. They knew that Christ was coming soon to take his own out of the world, leaving the other odd millions to their well-merited punishment.

Mr. Wymuth satisfied the Board that he believed in discipline for wayward girls—discipline, repentance, and after that a life of meek and lowly spirit—"And," said Mr. Wymuth, "my wife will be guided by me entirely," at which Mrs. Wymuth bowed her head and drew her thin lips more tightly over her blue teeth.

The Board breathed more freely. "It will be better now," said Dr. Smythe, "and I think it would be well to have the pastors appeal to the ladies to have a series of teas to raise money for the additional salary. I am sure the ladies will take care of it."

It was to the Girls' Friendly Home (under the Wymuth rule) that Helmi finally was committed. If she had been of the full age of eighteen years she would have been sent to jail.

The police matron, a silent woman, who held her job because she was no talker, came with her on the ear. Helmi, with her clothes in a little green valise which Miss Abbie had given her, walked confidently down the path which led to the big oak door. The former matron's flowers bloomed at each side of her. They nodded a welcome to her, and she felt reassured and comforted. It must be a nice home where there were so many flowers. Helmi had put on her pleated skirt and white middie, which now had the monogram on it, just like the other girls. She wore it today, because it had always brought her a good time and was full of the vibrations of fun and fellowship. The Blue and Gold Book was in her valise, and her English learning book, too. She would be all right, and Miss Rodgers would come, and the girls, too.

Helmi had not yet given up hope that Mrs. St. John would come to her aid when she was better. She still thought of her as she had last seen her, heavy-eyed, distressed, ill, and told herself over and over again that

this was why her dear friend had not come to her. She was still too sick to know what had happened. Helmi liked to picture the scene. Her friend in her slinky gown of black silk, with her pearls, would come; she would be wearing her green velvet cloak, the one that looked just like the ocean foam that had gone cutting away from the boat in creamy sands when she crossed the ocean, and her black hat with the silver arrow; she would come driving up in her big car and talk to the people in big swanky English words, making her eyes go snap like she could when she wanted the Doctor to do something. Everyone always did what Mrs. St. John wanted, and she would be so mad that people had been mean to Helmi, and she would call them names, and stamp her foot, and maybe swear a little—just a few good ones. And then she would turn and say "Come, Helmi, my poor, brave child."

Oh! it would be sweet. As Helmi was the first case to be brought in since Mr. and Mrs. Wymuth came, the worthy couple were determined to show the Board the value of discipline. The history of the case had been given them. The girl had refused to tell why she was in the Chinese den—it was evidently a stubborn case. Mr. and Mrs. Wymuth had dealt with stubborn cases before. The proud and forward spirit must be broken. And it could be. They were waiting eagerly for Helmi. The Board would expect results, and the Board would not be disappointed.

When the Police Matron and Helmi climbed the flight of stairs leading to the great front door and the bell was rung the lock was turned in the door and they were admitted into a dark hall. As they entered the door was shut again so promptly behind them that the corner of the Matron's cape was caught and had to be released. Then the big bolt shot into place, and in a whisper Mrs. Wymuth asked them to come this way, leading them down the hall to a gloomy room which she called her "Retreat." The door was shut and locked, and Helmi was told to sit down.

The Matron, living up to her reputation of being no talker, handed Helmi over with as much emotion as is shown by the ice man when he loosens his pincers from the square of ice and leaves it to drip his life out on your back step. His responsibility ceases when the step is reached.

"Good-bye, Helmi, be a good girl," she said, not without a degree of kindness. Her last delivery to the Girls' Friendly Home had pulled a handful of hair out of her not too well covered head, so she felt kindly to Helmi.

Helmi wrote her name in the brown book Mrs. Wymuth showed her, quite proud of the fine big letters she was able to make. She wrote her address "Co Miss Abbie Moore, 52 Chestnut St."

Mrs. Wymuth admired her writing. "And you can English speak?" she asked sweetly, feeling that if she transposed the words they would be more intelligible to the Finnish girl. "A little," said Helmi, smiling back. "You will learn more here," said Mrs. Wymuth. "All our good girls go to school. You like school?"

Helmi nodded. "Now, dear I want to be your friend—I am a little mother to all the girls—I want you to tell me all about yourself."

Helmi told her about coming to Saint Paul—her aunt's death—her coming to Winnipeg—Miss Abbie Moore—the Girls' Club. Suddenly she stopped.

"Yes—yes?" Mrs. Wymuth stretched the word out until it seemed like a sharpened pry which would be sure to lift another slab of conversation. "That is all," said Helmi.

"Who sent you for the medicine, dear?" asked Mrs. Wymuth casually. "I cannot tell," replied Helmi, looking her questioner straight in the eye. "You mean you will not tell. Now,

Helmi, trust me—I'm your little mother." She came over to the girl and laid her hand on her shoulder. Her touch made Helmi shiver, and when she bent nearer Helmi drew away from her.

"I will not tell," said Helmi again. Mrs. Wymuth drew her lips tightly over her two plates. "Well, see," she said, and Helmi knew it was a threat.

That night Helmi met the birds at supper. The table had been turned diagonally across the room to get greater length, and it had a clean cloth, although it was not Sunday; Mrs. Wymuth had expected a visit from some members of the Board.

"Now, girls," said Mrs. Wymuth, in her sweet way, after a lengthy blessing had been called down from on high, "we have a new girl, Helmi Milander. She has come to us for a while, and I want you to be very good to her, and very kind. Let her know she is among friends here. Helmi and I have had a little difference already, which I wish to tell you about. In order to help her I must know her whole story, and this she refuses to tell me. I have coaxed her, but she remains stubborn. Isn't she foolish, girls? I am here to help every girl, but the girls must help me. Isn't she foolish, girls?" she repeated.

"Yes, Mrs. Wymuth," said the girls in chorus. But they said it listlessly. Their days of mourning for the other Matron were not ended.

Then Mrs. Wymuth proceeded to tell the story, the girls listening open-mouthed. A new girl's story was always interesting.

"Now we will all pray that Helmi's stubborn spirit may be melted. You will all pray, won't you girls?"

Helmi sat looking from one to the other helplessly. Had she not one friend anywhere?

Every night after the evening meal there followed this orgy of prayers, when every girl who wanted to stand with the matron prayed. Much of it was meaningless, but as the prayers went on a certain excitement laid hold on them, and in their supplications they forgot that other ears than God's were listening, and unconsciously they revealed many things. The Matron was hopeful that Helmi would be swept into the whirlpool of excitement, and would tell what she wanted to know. Helmi sat still and listened, but refused to pray.

(To Be Continued)

From Personal Experience

New York Man Quite Convinced Scotch Are Tight

There is one man in New York who does not have to be convinced that the Scotch are "tight." He knows it—from personal experience in Scotland.

This man is Alex Smith, the famous golf professional. And this is the story:

Last spring, when George Duncan, the Scotch golfer, was over here he visited Smith. And he not only wore Smith's fanciest golf stockings—and other articles of his apparel—but wore holes in them. However, he said that when Smith visited him in Scotland he would show him the time of his life.

This summer Smith went to Scotland and visited Duncan. To entertain his American guest the Scotchman invited two attractive young ladies to dine with them. He ordered an expensive dinner, but when the waiter brought the check he passed it to Smith.

"We'll go fifty-fifty on this," he said, in all seriousness. I furnished the ladies and you pay the check," Smith admits he's "cured."

Rub It In For Lame Back.—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in the pain comes out and there are ample grounds for saying that it is an excellent article.

Origin Of By-Law

"By" is an old Scandinavian word meaning town and survives in the names of many towns, such as Derby, Whitley, &c. By-laws were originally town laws; that is local laws contrasted with national laws.

Girls admire promising young men, but everybody else prefers those who pay cash.

The movement of the human eye is controlled by six muscles.

BURNS

Minard's soothes and reduces the inflammation. Keep it on hand for sprains, bruises and flesh wounds.

MINARD'S LINIMENT
"KING OF PAIN"

If sometimes the tea you are using does not taste as good as it used to—just see what kind of a package it is in. No chances are taken with Red Rose. It is packed in clean, bright Aluminum.

Aerial Navigation

Edison Doubts That Peace Is Aided By Ocean Hops

Doubt as to the effectiveness of international and trans-oceanic flight in promoting international good-will and preventing future wars is expressed by Thomas A. Edison in an interview published in the September 15th issue of "Forbes Magazine." The aged inventor, having seen America involved in three major wars, seems to have little hope of a perpetual peace, even in that age when the airplane will have brought us all within commuting distance of each other.

"International flight," he says, "at high speed may possibly help men find a means toward stopping war. For with trans-ocean flight developed as it seems possible in years to come, simplification of international problems ought to be more probable than their complication. But I'm not sure of this. Men do not have full control of themselves."

Mr. Edison predicts that the most valuable of every business building's area is destined to be that part which now only keeps the rain off the offices on the top floor—namely, the roof. "When the helicopter is perfected," he points out, "roofs may be landing places for communications, goods and passengers. This would stimulate progress and at least to some extent relieve that intolerable street congestion which now is one of the most serious problems of every large community."

"Inefficient transport slows up humanity all along the line; efficient, that is, safe and speedy transport, speeds up civilization. Aerial navigation gradually will speed up transport of light articles and passengers in this country and everywhere else. Especially it will give us universally quick mail service; it is doing much already along this line. Quick mail service is of primary importance to business because it saves interest on money in transit. Cash and its equivalent in paper or goods in transit by slow methods are money lying foolishly idle to just that extent to which this delay is unnecessary. A dollar in transit for a week is wasted for a week, for money has no actual value except while it is at work."

Mothers Should Use

When The Babies Are Cutting Teeth

During the baby's teething time, in the hot summer months, the bowels become loose and diarrhoea, colic, cramps and other bowel complaints manifest themselves; the gums become swollen, cankers form in the mouth, and in many cases the child wastes to a shadow, and very often the termination is fatal.

This is the time when the mother should use "Dr. Fowler's," and, perhaps, save the baby's life.

It has been on the market for the past 80 years, put up only by The T. Milburn Co., Limited, Toronto, Ont.

Merely a Signature

A member of a congregation, becoming angry at a sermon the minister was preaching, wrote the single word, "Fool" on a sheet of paper, called an usher to him, and had it delivered to the minister in the middle of his sermon. The minister opened the paper and read what was written. Then he said: "An unusual thing has happened. A member of the congregation has signed his name without writing the letter."

Used by physicians—Minard's Liniment.

Was Interested In Photography

Queen Alexandra's interesting collection of photographs taken by herself has just been bought. Her late Majesty had a great gift of seizing a good picture, and would have made a name in this line were she born in a less exalted position. In the collection are pictures of every royalty in Europe, for more than half a century. Up to a few years before her death she kept up her interest in the camera.

Though unresponsive, as a rule, to natural beauty, Napoleon showed a marked preference for violets.

You can't get experience in this world on the easy-payment plan.

New Home Ready

Prince Of Wales To Take Up Residence In Marlborough House

The Prince of Wales will go into residence at Marlborough House soon after his return from Canada.

Marlborough House, an almost square, solid red brick building, was built by Sir Christopher Wren just over 200 years ago for the first Duke of Marlborough. Later it became the residence successively of various members of the royal family, and finally was acquired for King Edward VII, then Prince of Wales.

The present Prince of Wales will actually use only a small portion of the house himself. His suite will be on the first floor, which looks out on two acres of garden. A large room, which was formerly an audience chamber, will be converted into a combined reading room and study where the Prince will conduct the principal part of his correspondence. On the ground floor is a large room which will be used for the entertainment of friends who are not of the Prince's intimate circle.

Queen Alexandra's boudoir and bedroom will remain exactly as they were in her lifetime, as will also the four state rooms with their pictures and statuary. The same course was followed with regard to Queen Victoria. Rooms at Osborne House, Isle of Wight, where she died—although her death took place more than a quarter of a century ago and although Osborne House as a whole has been put to different uses—remain as they were in her lifetime.

Duty On American Publications

Forty-Nine American Periodicals Declared To Be Dutiable

Forty-nine American periodicals have been declared by the Canadian department of national revenue to be dutiable at 25 per cent. Hitherto, they have been entering Canada free of customs duty, as magazines. The periodicals run the whole gamut of thrill, romance and adventure from stories of the underworld to stories of the dream world and unravel the mysteries of crime.

The decision, in its formal language, holds that "periodical publications, consisting almost wholly of fiction and not containing a reasonable amount of critical and descriptive articles, news items or articles relative thereto or to current topics declared to be not entitled to entry under tariff item 184 as magazines."

Tariff item 184 provides for free entry of magazines; periodicals, held not to be so classified, will come under dutiable items. The forty-nine specified under the department's ruling will probably all now be classified as unbound novels and be dutiable under the general tariff—which is applicable to the United States—at 25 per cent.

Some Curious Lakes

Five On Peninsula In Caspian Sea Have Peculiar Features

On the Mangishlak peninsula, in the Caspian Sea, there are five small lakes. One is covered by salt crystals strong enough to allow a man and horse to cross the lake on foot. Another is as round as any circle, and of a lovely rose color. Its banks of salt crystal form a setting, white as snow, to the water, which not only shows all the colors from violet to rosy red, but from it also rises a perfume as of violets. Both the perfume and the color are the result of the presence of seaweeds.

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites rattle the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Memory Of Great Men

"The story of a nation's heroes is the fountain source from which it draws the wine of its later life. There is no inspiration that so quickens the ambition of youth, stimulates public service and deepens love of country like the memory of great men who have gone."—Arthur Mighen.

Dinner Sent By Air

Reno Rancher Ordered Sixty Plate Meal From San Francisco

The St. Francis Hotel at San Francisco received an order for a sixty-plate dinner to be delivered by aeroplane at the home of W. H. Moffit, cattle rancher near Reno, Nev.

Arrangements were made by telephone from the Moffit ranch to forward the meal in an express aeroplane, with electric heaters to keep the food hot, a head waiter to superintend the serving, and two aviators properly attired to serve.

A DOCTOR'S PRAISE

A Noted Doctor Strongly Endorses Dr. Williams' Pink Pills

The test of any remedy lies in its acceptance and employment by the qualified medical practitioner. No less an authority than Dr. Andrea Amici, physician to the Papal household, writing on the subject of anaemia, impoverishment of the nervous system and disorders attributable thereto, strongly endorses Dr. Williams' Pink Pills, recommending them as superior to other tonics.

Dr. Amici's testimony reads as follows:—"For several years I have made use of Dr. Williams' Pink Pills in my work and I have always found them efficacious in the treatment of disorders due to impoverishment of the nervous system, anaemia and neurasthenia, stomach weakness, retarded development in young women, and irregularities. There is no lack of tonic remedies, but in my experience no one of them manifests a superior efficacy to that of Dr. Williams' Pink Pills."

No more conclusive evidence of the value of Dr. Williams' Pink Pills could be asked for or given, than is found in the above endorsement of this noted European physician. Besides this, however, this medicine has enjoyed a world-wide public confidence for more than a third of a century and has brought relief to thousands and thousands of weak and suffering people.

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, nervousness and stomach trouble. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

Let the word of Christ dwell in you richly in all wisdom.—Col. III. 16.

"It is not the skill of human art which gives me power my God to know; The sacred lessons of the heart Come not from instruments below; Love is my teacher."

—Madame Guyon.

Every great teacher or leader lays stress on some single word of might,—the key, as it were, to his position. Buddha's great word was "renunciation." Zoroaster's, "purity." Menu's was "justice." The key to Confucius is "moderation." Moses emphasized "law." Plato, "harmony." Socrates, "reason." The strong word of Epictetus was "reliance." Antoninus, "self-possession." But Jesus gives us the key to the inner chamber of His heart in a single, mighty, sweet word,—"love."—O. B. Frothingham.

Oldest Hen Dead

The Methuselah among hens is at last dead. The Rhode Island Red hen, owned by Mr. G. Male, of Fordington, Dorchester, England, was 21 years old and broke the longevity record of the poultry world by two years. In old age hens grow weak, and about 14 eggs a year is the most expected of them. Mr. Male's bird, however, was laying well until last year.

League Accepts Generous Gift

An American group whose names are not disclosed, has offered a gift fund of \$2,000,000 to build and endow a library for the League of Nations and the Council of the League immediately accepted the offer after voicing its appreciation.

More than one-half of all the plate glass used in the United States goes into the construction of automobiles.

It's easy to impose on a man who has a good disposition.

Minard's Liniment relieves backache.

Ancient Egypt's sacred lotus was in reality a water lily.

A Buried Meteorite

Expect To Find Platinum In Giant Meteor In Arizona

Meteorites have a vast new significance. The other day a drill was broken 600 feet underground in a test boring in Canyon Diablo, Arizona. A simple accident. Yet scientists of several countries are wondering just why that drill broke. Furthermore, a group of practical mining men believe its breaking signifies that their fortunes are made—for they expect to find platinum in paying quantities at the 600-foot depth.

That is the latest chapter in the history of Coon Butte, or Meteor Crater, where it is believed a gigantic meteorite buried itself at some past time. The broken drill, declares Neil M. Clark in Popular Science Monthly, is the first positive indication that the main mass of the meteorite may have been located.

If actual mining, preparations for which are going forward, proves this to be the case, we shall have fresh evidence that truly we live in a hazardous and surprising world, since the very heavens can open and bombard us with "projectiles" weighing hundreds of thousands of tons. A meteorite such as that supposedly hidden under Meteor Crater could, if it dropped in the ocean, cause one of the most colossal tidal waves ever known or, dropping on land, could devastate the fairest part of Chicago or New York, and kill thousands of people (perhaps hundreds of thousands) in the twinkling of an eye. There is no reason to suppose that such a catastrophe, if it happened once, could not happen again, sometime, somewhere. Indeed, late news from Africa indicates that it has happened at least one other time.

Testing Big Seaplane

The Westminster Gazette announces that the British Ministry is trying out a 3,000 mile special seaplane development flight in the Baltic with a fleet of experimental flying boats as exhaustive tests for naval and commercial transport work. It is hoped, the Gazette adds, that the tests will involve huge all metal aerial battleships to act as the eyes of the fleet.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

Aids Settlement In West

The Canada Colonization Association, a subsidiary of the Canadian Pacific Railway for the settlement of privately-owned lands in Western Canada, in the first six months of 1927 accounted for the placement of 401 families on 97,944 acres of land.

Get Rid of HEMORRHOIDS (Piles)

EXPECTANT MOTHERS

Read Mrs. Menard's Letter. Her Experience May Help

Chatham, Ontario.—"I want to tell you how much good your medicine has done me. Before my baby came I felt so weak and run-down that I could hardly do my work. My head ached continually and I was so discouraged that I could cry from morning till night. I had another baby just one year and a half old and it gave me a lot to do. So I thought I would try Lydia E. Pinkham's Vegetable Compound, as I had read so much about it in the little books. I found a difference right away as my head was relieved and my tired feelings gone. My sister had been doing my washing and she continued doing it, as she said it might set me back if I started to do it again. It sure did help me and I had taken just two bottles when my baby came. He is a fine big boy, now nearly five months old. I am taking your medicine again and I am able to do my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as I believe they need help at those times."

Mrs. OLIVER MENARD, 24 Harvey St., Chatham, Ontario.

 The best values and handsomest styles we have ever offered.
 Phenomenal value giving makes this the sale of all underwear sales.

Mr. J. J. West, better known as Jimmie West, formerly of the Glenview telephone gang, met with an accident some three months ago, when, unloading, telephone poles and he was unable to work since. He is now completely restored to health and will join the "gang" again soon.

The weather Sunday was the real old time Alberta stuff—but, Monday made us think of the dear old country.

Miss S. Brahmant arrived a week ago from Enderby, B. C., to accept a position as nurse in the Blackfoot hospital.

Mrs. C. A. Van Winkle and two children, of High River accompanied by her mother, Mrs. Kruger of Calgary, are guests at the home of Mr. and Mrs. S. E. Lester.

When your friends visit you honor them by sending in the particulars to the Call for publication. Be very careful in getting their names right.

According to the way beef prices are soaring this should soon be the good old cowtown it once upon a time was—shine up your spurs boys and girls. Prosperity is coming this way.

Preserving Fruit of High
quality. Price Right. N
T. PURCELL, Gleichen.

A most delightful evening was spent at the home of Mr. and Mrs. J. C. Melvin, of Gleichen, when Mr. Dorothy Melvin entertained on Monday evening. The following guests were present: Mesdames Melvin, Sather and Mattson; Misses Vera Rasmberg, Roy Lewis, C. Hauser, M. Milroy, Evelyn Wood, Dorothy Melvin, Messrs. Lewis, Sather, Mattson, Brewer, Byers, Wright, Sutermeister, Melvin and Tom Bates. Courtship was played during the early hours of the evening with intermissions of songs and solos, after which a delicious lunch was served. Dancing was then enjoyed for a while and games were played.

A most enjoyable party was held at the home of Mr. and Mrs. L. Sather one evening last week when the following guests were present: Mrs. J. West, who is visiting with Mr. and Mrs. Sather and in who's honor the party was arranged, Messrs. George Reed, Tom Bates, Alex. Lewis, C. Leary, Brewer, Pugh, the Messrs. Ironside, Ramberg, Melvin, Green, Mrs. Robinson, Mrs. McNeill, Mr. and Mrs. Sather being host and hostess. Court whist was played on four tables where Miss Ramberg carried away the ladies' first prize and Miss Melvin the boys'. Mr. Tom Bates won an equal prize and Alex. Lewis the boys'. At eleven o'clock a delightful lunch was served after which some games were played and a number of dances held.

Keep on smoking—it helps.

(1) Lordship Randolph Bruce, of B.C., who attended the Festival. (2) A step in the Highland Fling. (3) Tossing the caber, one of the athletic events. (4) Winter-rose festival given on the grounds of the Hotel Vancouver Hotel. (5) Ralph Cameron, who presided at the open-air service in the Beacon Square.

According to general comment, to be forgotten in the rush and

throughout the country, the second decisive step towards reviving and preserving the wealth of music, indigenous of this country.

was achieved with the conclusion of the Highland Gathering and the Banff Folk Festival at the Banff Springs Hotel, Banff, Alberta, during the first week of September. Not only in Canada but throughout the world, folk music enthusiasts were following newspapers and current magazines commented most favorably upon this musical event, the first of its kind in western Canada. The success was due to many factors, among them being the Canadian Folk song and Handicraft Festival was held at

Protest of the interest taken in them by the people of the West. The first was held when the Right Hon. Stanley Baldwin, Premier of Great Britain, visited the West Coast of Canada in 1923. It was held at Quebec. This event was one of the first of public interest in the West touched upon by the Premier after his visit to the West. The Premier observed with pleasure the success of the Festival and stated that events of that kind were invaluable to the people of the West. The songs, songs and handicrafts which were so sorry to observe, were worth a great deal of money. The Scots in Canada played a memorable part in the development of the West. They were the first to bring money in many enterprises, including trading and exploration enterprises—such men as Fraser, Mackenzie and others. They were the first to bring past generations who penetrated the mountains of the West. It was there in the same mountain, where all the people of the West were the Scottish Festival was held and for which hundreds gathered from all parts of the country to attend the Festival.

The Gathering, a festival of the character, as each of the seventeen

Scottish regiment in Canada had pipers present to compete for the highest honors. The artists themselves were in most cases Scots of no mean artistry. The festival of music was supplemented by a full program of Scottish games and tests of prowess, which proved one of the outstanding features of the three-day gathering.

While many colorful events have taken place at this famous mountain resort the Scottish Festival was perhaps the most picturesque, for in addition to the brilliant plaids of the Highlanders, were to be seen the traditional kilts of the British soldiers who rather than the Blood and Stency Reserves to witness the events. They watched with keen interest the whirling dance steps of the Scots and were awed by the skill of the pipers. In turn they demonstrated their old-time traditional songs and dances described by the early Scottish explorer, such as Sir Alexander MacKenzie and Alexander Henry.

Every industry, be it large or small, adds to the progress and prosperity of any community. Every such industry brings new capital to a town, and distributes this among the business men generally in the way of wages and salaries. Everybody benefits.

Among local industries there is none of greater importance in any community than the local home newspaper. Not only does it provide employment for a certain number of workmen, but it offers a service to the community which could be obtained in no other way.

In their own best interests, therefore, business men should use their local paper for purposes of advertising, and also for the procuring of their requirements in PRINTING. All business men need printed matter of various kinds from time to time. Remember your local printing office when in need of printed matter.
